

Hail Alley: the pattern across the United States

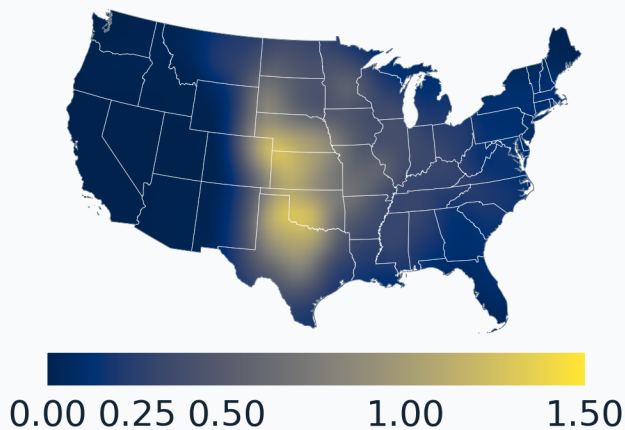

Reported hail ≥ 1 inch (25.4 mm) • 2011–2025 • Days within 25 miles (40.2 km)

Historical reported severe hail—not a forecast, storm-footprint map or property-level roof-damage assessment.

Larger hail

≥ 2 inches (50.8 mm)

More frequent hail means more exposure.

It does not measure roof-damage probability.
